

ENERFAT[®]

Premium **Ca-soap bypass fat** made from RBD-grade palm oil with patented technology that significantly reduces odor, resulting in better palatability. Highest digestibility among all bypass fats, ensures optimal energy absorption and improve milk yield.

Efficacy

■ Increase milk yield:

By providing a high-energy supplement, Enerfat supports the animal's metabolism and productivity.

■ Highest and consistent fat digestibility:

Enerfat contains a specially formulated Ca-soap bypass fat that are easily digested and absorbed by the digestive system.

■ Superior palatability:

Enerfat designed by patented process to reduce odor, significantly enhancing it's palatability.

■ No interfere rumen bacteria:

Bypasses the rumen, ensuring that it does not disrupt the delicate balance of rumen microorganisms.

Composition

- Food(RBD) grade palm oil
- Crude fat: 80.0% min.
- Energy: 7,900kcal/kg

**Energy
Supply**

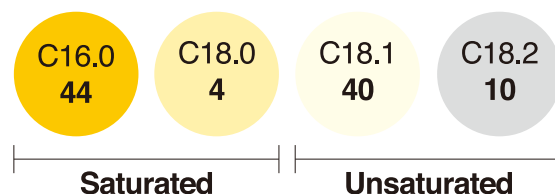

**Milk
Yield**

**Low
Odor**

Fatty Acid Profile

(% of total fatty acids)

0% Trans fat

DOSAGE (kg / ton of feed)

Cattle

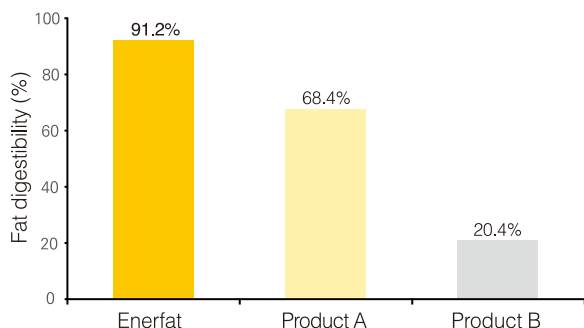

- In feed 10~30kg (1~3%)
- Top dressing 100~300g/head/day

**Swine, Brolier,
Duck**

- 5~20kg (0.5~2%)

Trial data

- Digestibility according to the type of rumen protected fat in Holstein cows

- Milk yield according to different types of bypass products in dairy cows

- Control - Basal diet
- T1 - Basal diet + Enerfat 300g/cow/days
- T2 - Basal diet + Competitive product A 300g/cow/days
- T3 - Basal diet + Competitive product B 300g/cow/days
